

Managing CKAN Organizations

My DataCity Organization

Step1. Select DataSets and Resources

Datasets / Create Dataset

What are datasets?

A CKAN Dataset is a collection of data resources (such as files), together with a description and other information, at a fixed URL. Datasets are what users see when searching for data.

1 Create dataset

2 Add data

Title:

Cartografia - Area verde

* URL: opendata.khaos.uma.es/dataset/cartografia-area-verde Edit

Description:

Cartografia - Area Verde Málaga

Step 2. Giving rights to colleagues

The screenshot shows the DataCity profile of Rubén Navarro. The left sidebar contains profile information: 3 followers, 6 datasets, an 'Unfollow' button, and lists for Organizations (DataCity) and Groups (none found). A 'Tags' section lists various categories like 'bus', 'malaga', 'movilidad', 'transporte', 'agua', and 'area verde' with their respective counts. The main content area has tabs for 'Datasets', 'Activity Stream', and 'About', with a 'Manage' button. Below these is an 'Add Dataset' button and a search bar. A list of 6 datasets is displayed, sorted by relevance. The datasets include 'Fuentes Agua Potable Málaga' (ZIP), 'Niveles de Polen 2019 Málaga' (CSV), 'Cartografía - Area verde' (GeoJSON), 'LINEAS y Paradas bus' (PRIVATE, GeoJSON), and 'Puntos Venta EMT' (PRIVATE).

Step 3. Asking for rights from colleagues

The screenshot shows the profile of 'BigDataFMR' on the Open Data Platform. The profile includes a red logo with the text 'NEW RV' and a quote. It shows 2 followers and 2 datasets. The datasets listed are 'Calidad del Aire -Málaga-' (PRIVATE) and 'Lineas y Estaciones --Málaga--'. The interface includes a search bar, navigation tabs for Datasets, Activity Stream, and About, and a dropdown menu for ordering results by Relevance.
